

Did you know fledgling birds are old enough to leave the nest, but too young to fly?

We feed FONS to nestling & fledgling birds. WILDNorth raises hundreds of baby birds each year!

BAKING FOR WILDLIFE

Ingredients:

Formula for Nestling Songbirds (FoNS©):

- 1 cup (130 g) grain free high protein Kitten Formula (dry)
- 1.5 cups (355 cc) water
- 5 Tb (30 g) egg white
- 2 tsp (9 g) corn, sunflower, or canola oil
- 3.0 g pure calcium carbonate crushed tablets or powder
- 5.0 g (~1/2 tsp) active-culture plain yogurt

Directions:

- Pre-soak kibble in water until soft; do not drain any excess water.
- Combine with other ingredients and blend thoroughly in a food processor (It may take several hours to soften completely, but somewhat less time is needed if the kibble is pulverized in a food processor before adding water)
- Formula made with incompletely-softened kibble will have a gritty consistency and will not draw well into feeding syringes, so please blend well!
- Once blended, freeze in containers, and label with the date it was made

Nestling Robins

Fledgling Robin

WILDNorth will accept frozen FONS as a donation. Before donating, please call 780-914-4118. Thank you!
